### *Terrain:*

---

Best terrains of the county have a rich contour character due to sand dunes created by the wind. Contour is highly varied but of small equidistance, 10-20 m, so maps are drawn with 2m contour lines. Terminology for the local native flora is „forest steppe”, an open area

mixed with smaller and broader forests. Forest squares mostly of pine trees are also to be found on the terrain that enable a high running speed.

---

*Map:*

---

Surveyed in 2017, CRC:1:10.000, LDC: 1:10.000 and 1:15.000, contours 2m.
